

Oil spills can cause a wide range of impacts in the marine environment and are often portrayed by the media as 'environmental disasters' with dire consequences predicted for the survival of marine flora and fauna.

Our company supplies innovative equipment for the prevention and response to oil spills. We readily suggest solutions and supply equipment for problems arising in aquatic systems (lakes, rivers, canals, marshes, etc.) and hazardous chemical/medical waste disposal.

Our goal is to identify and provide reliable applications of technologies proved to be successful when dealing with pollution incidents.

This is why we provide products made by the world's most reputable manufacturers in the field of anti-pollution technology.
